```
 TITLE: This is a linear model with continuous data under normality
assumption

 DATA:
 !!!path to your data file
 FILE IS "MARS_int_POM.dat"; !data file

 VARIABLE:
 !!!variables in your data file
 !!! it is the same to write ARE or IS or =
 NAMES ARE ID T4 T5 T6 T7 T8 T9 T10 T11;
 USEVARIABLES ARE T4–T11;  !!!variables to include in your analysis

 MISSING=.;
 IDVARIABLE = ID;
 ! USEOBSERVATIONS = pcl_cases GE 2;
 ! ALGORITHM=INTEGRATION;

 CLASSES= c(3); ! Number of classes

 ANALYSIS:
 TYPE = mixture;
 ESTIMATOR = MLR;
 ITERATIONS = 1000;
 CONVERGENCE = 0.00005;
 COVERAGE = 0.05;
 PROCESSORS = 2;
 STARTS =1000 100;

 !LRTSTARTS = 3 2 150 15;

 MODEL:
 !!!loadings (0,1,2,3,) indicate equal distance between observations
 %OVERALL%

  I s | T4@0 T5@0.3 T6@0.7 T7@1.1 T8@1.4 T9@1.5 T10@1.7 T11@2.5;

  !I@0;
  !variance slope = 0:

  !s@0;
  ! covariance = 0:
  !I with s@o
  ! mean slope = 0:
  !(s@0);

  OUTPUT:
```

```
sampstat stand tech1 tech4 tech7 tech11 tech14;
Plot:
Type Is Plot3;
Series Is T4 - T11(*);
SAVEDATA: SAVE=FSCORES;
FILE IS 3class_int.csv;
```
